

BiTrac™ MaxShield Select™

Total face mask for Non-invasive Ventilation

Critical Care ▪ Pulmodyne®

BiTrac™ MaxShield Select™

Our total face mask, the BiTrac MaxShield Select, avoids the nose and disperses pressure over a larger surface area while reducing claustrophobia for the patient. Our interchangeable elbows greatly reduce waste since you can easily remove and replace the mask's elbow when transitioning patients between standard ventilators and bilevel machines.

3 sizes available
from extra large adult to small adult

Breathable headgear

Secure clips

Soft silicone seal

Bayonet style lock
for secure elbow connection

Interchangeable elbows available
to fit your patient's needs
